Continuation of Disposition of Claims: Claims withdrawn from consideration are 3,10-14,16,17,19,20,24-26,29,34,36-40,42,43,45-47,51-53,55,56,62,63 and 65-70.

DETAILED ACTION

Claims 1, 3, 5-40, 42-59, 61-63 & 65-72 are pending in the instant application; of which Claims 3, 10-14, 16, 17, 19, 20, 24-26, 29, 34, 36-40, 42, 43, 45-47, 51-53, 55, 56, 62, 63 & 65-70 are withdrawn from further consideration as being drawn to a non-elected invention. Therefore, Claims 1, 5-9, 15, 18, 21-23, 27, 28, 30-33, 35, 44, 48-50, 54, 57-59, 61, 71 & 72 are examined herein.

Response to Restriction

Applicants' election with traverse of **Group IV** is acknowledged. The traversal suggests that the method of use (**Claim 61**), which is commensurate in scope with the elected product claims, such be examined too. In response, Applicants' request to included **Claim 61** in the elected group has been considered and accepted.

Claim Objections

Claims 1, 35 & 44 are objected to because of the following informalities: said claims contain the variable R1, which has no place to be a substitute on a fused bicyclic thiazole or oxazole. Further, R2 is C₀, therefore it is a bond and the phenyl moiety should be connected to the two position of formula in Claims 1 & 44. Both corrections would help clarify the structure for any reader. Further, the claims should be amended to delete the non-elected subject matter (which includes in this case the variables R1 and R2). Appropriate correction is required.

Art Unit: 1626

Claims 7-9, 15, 18, 21-23, 27, 28, 30-33, 35, 49-50, 54, 57 & 61 are objected to for the following informality: there should be a space between the word "claim" and the claim number "#" in each circumstance. Claim 6 should be amended to depend on "claim 1" not "claims 1". Appropriate correction is required.

Allowable Subject Matter

The present invention pertains to the compounds and compositions according to the formula in **Claim 1** and methods of using these compounds for the treatment of diabetes. The compounds according to formula I are free of the prior art; nothing known in the art anticipates or renders the compounds of the instant application obvious. The closest prior art related to the formula I is compound RN 579524-13-3, taught by Endo *et al.* (*WO 2003066574 A1*, 08/14/2003). Compound RN 579524-13-3, shown below, fulfills all of the limitations of said formula with the exception of **R**^{3 or 4}, which is an amino moiety. In the instant application, **R**^{3 or 4} can be a hydrogen atom, a substituted or unsubstituted alkyl, or the alkyls can combine to form a ring.

One skilled in the art would be enabled to make and use the compounds taught herein for the purpose of treating diabetes using the teachings of the Specification

Art Unit: 1626

(assays on pages 240-255) in conjunction with the teachings in the prior art (see Rami et al. Expert. Opin. Ther. Patents, 2000, 10(5), 623-634, cited in IDS).

Telephone Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason M. Nolan, Ph.D. whose telephone number is (571) 272-4356 and electronic mail is Jason.Nolan@uspto.gov. The examiner can normally be reached on Mon - Fri (9:00 - 5:30PM). If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph McKane can be reached on (571) 272-0699. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
